

27th International Workshop on Smart Antennas

March 17–19, 2024 | Dresden, Germany

PATRONAGE OPPORTUNITIES

ABOUT

The **27th International Workshop on Smart Antennas (WSA 2024)** provides a forum for discussing the most recent research on communication and information theory, related signal processing algorithms, and experimental results for wireless communications with special focus on multiantenna (MIMO) systems. The objective of the conference is to continue, accelerate, and broaden the momentum already gained through a series of workshops which started in 1996.

Alongside the presentation of scientific papers, this event will feature invited top-level speakers from both academia and industry. Moreover, it will provide an exhibition space where demonstrators such as wireless simulation tools, testbeds and prototypes can be presented.
